- In the manually operated version, the door is assisted by a gas cylinder.

- We have several solutions for access control and companionway operation control:
  - RFID badge reader
  - key pad
  - membrane Keyboard
  - switches
  - control

COMPANIONWAY WITH SECTIONAL SLIDING DOOR

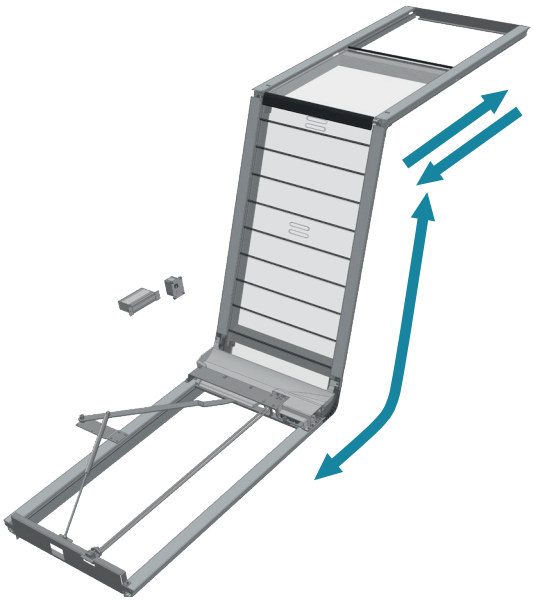

EXAMPLES OF TYPES: BENETEAU SENSE 50 - 55, DUFOUR 530, GRAND SOLEIL 80

- This companionway system makes it possible to stow a vertical door horizontally under the cockpit. The door assembly comprises several plexiglass formats integrated securely. The top horizontal sliding panel slides back and forth.

Credit: Noval

- This system can be :
  - fully motorized
  - partially motorized (vertical door or horizontal panel)
  - fully manual

- For these three versions, the lock is electric..

- For the motorized versions, it is possible to manually override the system in the event of electrical failure on board.

- For the manually operated version, the door is assisted by a gas cylinder.

- We have several solutions for access control and companionway operation control:
  - RFID tag reader
  - key pad
  - membrane keyboard
  - switches
  - remote control
